Apply2Succeed™ Reading

Apply · Achieve · Succeed

The field test for districts and schools

FIELD TEST · NOVEMBER 2026 THROUGH JUNE 2027

Use the full program free for the rest of the school year

Apply2Succeed Reading is a supplemental reading program for middle school. Every student reads at their own level, from a grade 3 reading level to grade 11. We are inviting a small group of districts and schools to use it with their students. We believe they will benefit. All we ask in return is your feedback.

No cost

Free for the rest of this school year. It ends in June, with nothing to cancel and nothing billed.

The complete program

The same Apply2Succeed that will launch: every level, passage, benchmark and report.

What we ask

Your feedback: what works, what gets in the way, and what you wish it did. That is the whole commitment.

What your schools get

- **Nine reading levels**, each with 20 passages and a Challenge at the end
- **90 Skill Booster passages** for students who need more practice in a strand
- **English audio, and Spanish text and audio**, which teachers turn on for the students who need them
- **Every teacher report**, from a whole-class view down to a single passage, with your state's standards and codes
- **Three reading benchmarks** that place each student and show how much their reading has grown
- **Online training**: three short videos instead of a training day, and support from us by email

How it runs

1. **You tell us you want to join.** We reply, usually within one school day.
2. **We set up your accounts:** district, schools and teachers. Each teacher gets an email invitation.
3. **Teachers create classes** and print a sign-in card for each student. Students need no email address.
4. **Students take the placement test**, an untimed benchmark that starts each student at the right level.
5. **Students read at their own pace** for the rest of the year while teachers monitor progress.
6. **Students take the benchmark again**, so you can see how much their reading has grown.

What it takes from a teacher

One sitting to set up a class. After that students work on their own, scoring is automatic, and the reports are there when you want them.

Standards and accessibility

Passage questions and reports follow your state's reading standards and codes, in all 50 states and DC. Designed to meet WCAG 2.1 Level AA, by keyboard and with screen readers.

Privacy and IT

- Runs in a current browser, Chromebooks included, with nothing to install and one domain to allow: apply2succeed.com.
- Designed to support schools' obligations under FERPA and COPPA. We never sell student data.
- Study results never identify a student, teacher, school or district.
- We review and sign a district's data privacy agreement on request.

Join our field test

Fill in the sign-up form, and we will reply by email, usually within one school day.
